

Newborn Nature Package

R2000

2hours photoshoot

60 fully edited photos in high resolutions in digital format

This photoshoot takes place in little forrest in Constantia - Cape town.

It is combination of lifestyle photoshoot and posed newborn photography.

At first I do photograph the whole family interacting with the baby, holding it in different positions. Baby can be awake for this and can be wearing his/hers "normal" clothing.

Later when we finished with family photos we will change baby in some of my cute clothes and it is also good time for feeding. After that baby should fall asleep and I can photograph it in one of my baskets on its own. We need the baby to be asleep for this thats why this photoshoot has to be done in first two weeks of babies life. If its done later if can take much longer for baby to sleep and it can be quite a tiring for everyone, but specially for already tired new mom.

Due to the Covid19 there is limited physical interaction between me and the clients. Parents are handling changing of the clothing of baby and any other physical adjustments. Sanitizing is used before the shoot. I don't wear face mask during the photoshoot as there is big enough distance between me and clients.

50% deposit is required to secure your booking and date.
